

site name containing a first character matching the character associated with said alphanumeric key;

effecting a second actuation of the same or another alphanumeric key on said keyboard;

creating a monitor display of the or each stored network station name or internet site name containing first and second characters matching the characters associated with said first and second alphanumeric key;

*H1  
cancel.*  
if necessary, effecting one or more further alphanumeric key actuations and creating a monitor display of the or each stored network station name or internet site name containing an initial sequence of characters matching the sequence of characters associated with the sequence of alphanumeric key actuations;

effecting user input to the system to mark the or a user selected displayed name having said matching sequence of characters; and

then effecting user input to the system to establish communication between the PC/TV computer system and a network station corresponding to the displayed network station name or internet site marked by said user input.

---

20. (Amended) A computer system emulating a television system comprising:

a merged PC/TV receiver and selectively operable in a user selectable TV mode or computer mode;

*H2*  
a monitor connected to said computer system and operable to provide a display in each of said TV and computer modes; and

an alphanumeric keyboard for providing alphanumeric information to said computer system, said computer system being capable of interpreting different predetermined alphanumeric key actuations on said alphanumeric keyboard as respective channel macros associated with network channels, the combination of said computer, said monitor and said alphanumeric keypad providing a user a visual listing of networks by depicting on said monitor successive lists of network names, each list containing network names including an initial sequence of a plurality of characters matching the sequence of characters associated with a sequence of alphanumeric key
